## We've Ruined the CORN CROP!

For years the corn crop of this part of the beach has been enormous. Reckless shoe sellers made it so. Everybody had to "break in" their shoes or get someone else to do it for them, and by the time they were broken in they were broken out also, and that broke pocket books.

Plenty of rain in Kona and Kau.

The Peru was to sail from Yokohama on March 15 for San Francisco, which would make her due here March 25, if the new schedule affects her in regard to all the Transpacific lines stopping at Honolulu.

The cargo for the Zealandia for San Francisco tomorrow will consist of 18,000 sacks sugar, 1000 bundles hides, 150 barrels tallow, 4000 bunches bananas, 400 bags rice and 200 crates pineapples. There are about 80 passengers booked for the cabin and a lot of Portuguese are on the list for the steerage.

#### Explosives From the Mohican.

All the fires on the Baltimore and Mohican are out and the ammunition which the latter brought from Mare Island is being transferred to the big cruiser. The red danger flag is flying from the foremast of the vessels and the utmost care is being maintained in the handling of the explosives. Even the launches are kept away for fear of some of the sparks from their funnels finding their way to the powder while it is being handled. The ammunition is loaded on one of the big railway barges off the starboard side of the Mohican, which is then pulled over to the port side of the Baltimore and discharged. On the starboard side of the cruiser the sailors are busy coaling, there being about one hundred tons to go on board yet. The Baltimore expects to sail now about Saturday morning. It is impossible to get everything ready before then.

### BRITISH NAVAL ESTIMATES.

Colonial Sea Proposed and the Plan, kept a secret.

London, March 10. —The first lord of the admiralty, Mr. George J. Goschen, in presenting the naval estimates today, pointed out that, with the outlay on naval works, the expenditure amounted to the colossal sum of £25,550,000 (£12,750,000), which he said was even considered inadequate in some quarters. Mr. Goschen explained that the navy was in a transitional state, to which many of the admitted deficiencies were due. Moreover, he added, the government was introducing a series of improvements. The Jubilee display had been great, but they had not reached the ideal standard. Referring to the Channel squadron he said it was the most powerful ever gathered together, its duties being not only to parade the Channel, but to engage in effective operations in time of war. He dilated upon the quiet and unostentatious increase of the British fleet in China waters by four vessels from other foreign stations as being an instance of the naval preparation. Mr. Goschen said he hoped the admiralty would not be too hastily pressed to communicate its plans, and assured the house that in the distribution of cruisers, for instance, the admiralty had considered carefully the protection of every trade and every food supply route, and he trusted that "if times darkened" the admiralty would have the confidence of the house and would be found doing its duty.

Touching upon the increase in the personnel of the navy, Mr. Goschen said there was no lack of recruits for the navy. In fact, he added, only one in eight boys was accepted and the supply of stokers was also improving. Mr. Goschen also denied that the navy was undermanned, declaring that every vessel that took part in the Jubilee review was as fully manned as it would be in time of war. He admitted there was a paucity of officers, but that would be easily remedied.

Touching upon the building program, Mr. Goschen said he would defer furnishing particulars regarding the proposed number of warships in order to keep foreigners in the dark concerning their plans; but he could say that the battleships and cruisers would be adapted to the special circumstances which the past year had revealed in various parts of the world.

#### With the Footballers.

Two new Rugby footballers joined the corps yesterday. Late in the afternoon an interesting game was played in front of the drill shed. The first public game will take place a week from Saturday afternoon at Makiki. It will be an admission fee affair. The proceeds will go to local charities.

#### Judge Hitchcock Improving.

Deputy Marshal H. R. Hitchcock sent a telephone down by the Mauna Loa to the effect that his father is much better at Hilo. No mention of the Judge's condition is made in Saturday's Tribune. It is learned from private sources that the treatment of the carbuncle by Dr. Rice was entirely successful.

#### They Stole Sugar.

H. Kanakaemoku and Kalawia, the two native sailors arrested yesterday for stealing a bag of sugar from one of the Wilder steamers, was before the District Magistrate this morning on the charge of larceny in second degree. Both were found guilty and were sentenced each to 50 days' imprisonment.

#### Introduces New Light.

Mr. Kohn exhibited in King Eros' annex last evening his acetylene gas lamps, a new process of lighting. The room was illuminated by the lamps. A soft light is given out by the gas, and the system is safe and cheap. It is designed especially for private houses and stores. The process is a new invention.
